

Dear Mr Wellington,

## ROUTER INFORMATION

**Please note the router has been pre-configured** to work with your connection, you do not need to run the setup.

**To install your router follow the steps below**

1. Connect the DSL socket on your router to the your phone socket (or use the enclosed micro-filter if you do not have a separate DSL port on your phone socket).
2. Plug the power supply into a mains power socket and connect it to the router.
3. Turn on the mains socket and the router (power button located on rear).
4. After a couple of minutes the router will be ready for use.

**To connect to your routers WiFi use the details below.**

SSID: **cloudscape-7862**

Password: **14605239**

## THE SETTINGS BELOW ARE PROVIDED FOR INFORMATION ONLY

If you need to change your routers settings, our support team are happy to assist and can provide remote support to your router. If you are unsure about making changes please contact us first.

To access your routers settings, once connected enter **192.168.1.1** in your web browsers address bar.

Your routers login details are below.
